

Client: Builtform Constructions

Windsor Train Station Upgrade:

In 2009, Builtform Constructions were awarded the tender to revitalise the whole Windsor Train Station and Commuter Carpark precinct. As part of this project Builtform Constructions were required to provide a number of passenger infrastructure facilities. Builtform engaged Adshel Town and Park to Supply and Install City Seats with Ecotimber Battens, LB5 Aluminium Litterbins and B6 Powdercoated Aluminium City Bollards. All items were fabricated and assembled in-house at our Frenchs Forest factory, delivered to site and installed as part of our closed loop supply capacity.
